The Non-Aligned Movement (NAM) is the largest
and most diverse political grouping of states
engaged on issues related to nuclear
nonproliferation and disarmament. Drawing on the
authors first-hand experiences as members of NAM
observer-state delegations in NPT and IAEA
negotiations, as well as the findings of a larger CNS
research project on NAM nuclear politics, the book
will provide important new insights about how a
small subset of NAM states has tended to dominate
NAM politics and have promoted policies that are
often at odds with those advanced by Western
states on issues such as nuclear terrorism, IAEA
safeguards, nuclear export controls, multinational
fuel arrangements, proliferation in the Middle East,
NPT, and nuclear arms control and disarmament.
Based on an analysis of NAM perspectives, politics,
and priorities, the book will provide practical
recommendations for engaging NAM members in a
more constructive fashion on issues related to
nuclear nonproliferation, disarmament, peaceful
use, and counter-nuclear terrorism. Particular
attention will be given to problems likely to be
encountered when Iran assumes the chairmanship
of NAM in 2012 and how these difficulties can best
be mitigated in the lead up to the next NPT
Review Conference.

textbook. It is strictly based on 2021 Examination Pattern. Recommended for only CBSE students.

Our NEET Foundation series is sharply focused for the NEET aspirants. Most of the students make a career choice in the middle school and, therefore, choose their stream informally in secondary and formally in senior secondary schooling, accordingly. If you have decided to make a career in the medical profession, you need not look any further! Adopt this series for Class 9 and 10 today.

This book presents an analysis of the correlation between the mind and the body, a complex topic of study and discussion by scientists and philosophers.

Drawing largely on neuroscience and philosophy, the author utilizes the scientific method and incorporates lessons learned from a vast array of sources.

Based on the most recent cutting-edge scientific discoveries on the Mind-Body problem, Tomasi presents a full examination of multiple fields related to neuroscience. The volume offers a scientist-based and student-friendly journey into medicine, psychology, artificial intelligence, embodied cognition, and social, ecological and anthropological models of perception, to discover our truest self.

The revised edition of the series Foundation Mathematics for Classes 6, 7 and 8 is based on the latest curriculum prepared and recommended by the Council for the Indian School Certificate Examinations, New Delhi. The present mathematics curriculum aims to develop a number of Mathematical Skills (like Numerical Calculation, Algebraic Manipulation, Spatial Visualisation, Data Analysis, Measurement, Estimation and Approximation) and Mathematical Processes (like Reasoning, Communication and Connections, Problem solving and Heuristics, Estimation, Technology etc.) among students at these levels. This series has been developed and designed keeping in mind the following objectives of the latest curriculum : Students should :

- Enjoy learning of mathematics.
- Learn important mathematics that is much more than few formulas and mechanical procedures of solving problems.
- Pose and solve meaningful problems.
- See mathematics as something to talk about, to communicate, to discuss among themselves, to work together on.
- Understand the basic structure of mathematics : Arithmetic, algebra, geometry and trigonometry, the basic content areas of school mathematics, all offer a methodology of abstraction, structuration and

generalization Goyal Brothers
Prakashan

Equations and inequalities --
Linear equations and functions
-- Linear systems and matrices
-- Quadratic functions and factoring -- Polynomials and polynomial functions -- Rational exponents and radical functions
-- Exponential and logarithmic functions -- Rational functions
-- Quadratic relations and conic sections -- Counting methods and probability -- Data analysis and statistics -- Sequences and series -- Trigonometric ratios and functions -- Trigonometric graphs, identities, and equations.

Questions are the root cause of success. The more new & authentic questions you will have, the more new & authentic knowledge you will have.

Considering this fact, the Department of Education in Science & Mathematics (DESM) with an aim to improve the quality of teaching/learning process in schools has made an attempt to develop resource books of Exemplar Problems in different subjects at secondary and higher-secondary stage. These specialized resource books named NCERT Exemplars are not meant to serve merely as question banks for examinations but are primarily meant to discourage rote learning. The first and the only books of its kind by Arihant Publications is an attempt at providing comprehensive guide to NCERT Exemplar Problems-Solutions for

Class 6th to 12th. The present book for Class 8th Science contains different types of questions of varying difficulty level. Also detailed explanation for comprehensive understanding has been given for all objective and subjective problems. The present book has been divided into 18 chapters namely Crop Production & Management, Microorganisms: Friend & Foe, Synthetic Fibres & Plastics, Materials: Metals & Non-Metals, Coal & Petroleum, Combustion & Flame, Conservation of Plants & Animals, Cell: Structure & Functions, Reproduction in Animals, Reaching the Age of Adolescence, Force & Pressure, Friction, Sound, Chemical Effects of Electric Current, Some Natural Phenomena, Light, Stars & Solar System and Pollution of Air & Water. The problems provided in the book will test comprehension, information recall, analytical thinking and problem-solving ability, creativity and speculative ability. Detailed explanation has been provided for all objective and subjective problems covered in the book. The book will also be highly useful for school examinations and to build foundation for entrance examinations. As the book contains detailed and comprehensive solutions for NCERT Exemplar problems for Class 8th Science, it for sure will act as a catalyst in helping discourage rote learning.

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

As prospective Architecture students concerned with

professional advancement, you are aware of the importance of good tools and backing of solid research. In this book, we offer you both. The book titled "Steps To Architecture" has been compiled to meet the requirements of students who wish to seek admission through NATA (National Aptitude Test in Architecture) conducted by COA (Council of Architecture) in India. It conforms to the latest test patterns and comprehensively covers each and every type of question which is encountered in the exams. The book covered both Drawing & Aptitude Test content as per New Pen and Paper Style. The drawings/sketches have been incorporated in this book so that the students may follow sketches perfectly coordinating the subject matter. In this book, numerous informative notes with sketches have been arranged to make students understand the subject. This is the only book presently in the market, which deals with each aspect of Architecture Entrance Exams and contains all relevant questions, making it exhaustive and complete in all respects. Lakhmir Singh's Science for Class 8 Foundation Mathematics for Class 6 FOR 2022 EXAMINATIONS Foundation Course for NEET (Part 2): Chemistry Class 9 Learning Elementary Physics for Class 6 According to the defined

canons of art technique, a portrait should be, above all, a faithful representation of its model. However, this gallery of 1000 portraits illustrates how the genre has been transformed throughout history, and has proven itself to be much more complex than a simple imitation of reality. Beyond exhibiting the skill of the artist, the portrait must surpass the task of imitation, as just and precise as it may be, to translate both the intention of the artist as well as that of its patron, without betraying either's wishes. Therefore, these silent witnesses, carefully selected in these pages, reveal more than faces of historic figures or anonymous subjects: they reveal a psychology more than an identity, illustrate an allegory, serve as political and religious propaganda, and embody the customs of their epochs. With its impressive number of masterpieces, biographies, and commentaries on works, this book presents and analyses different portraits, consequently exposing to the reader, and to any art lover, a reflection of the evolution of society, and above all the upheavals of a genre that, over 300 centuries of painting, has shaped the history of art.

Composite Mathematics is a series of books for Pre Primer to Class 8 which conforms to the latest CBSE curriculum. The main aim of writing this series is to help the children understand difficult mathematical concepts in a simple manner in easy language.

S Chand's Smart Maths is a carefully graded Mathematics series of 9 books for the children of KG to Class 8. The series adheres to the National Curriculum Framework and the books have been designed in accordance with the latest guidelines laid down by the NCERT.
